

V20 Variable Speed Drive

Description

The V20 is a compact AC drive that features a wide power range from 0,25 kW to 18,5 kW. The built-in PLC allows programmable logic to be easily altered which enables unused input/outputs of the drive to be assigned to other tasks.

Features

- User friendly interface with start-up wizard for quick and easy configuration
- Built-in EMC filter to remove electromagnetic interference and lower harmonic levels
- Built-in RS485 interface for fieldbus control
- AC choke and brake chopper to balance voltage drops and spikes

Standard I/O

- | | |
|----------------------|-----------------------|
| • 6 x Digital input | • 1 x Analogue output |
| • 2 x Analogue input | • 2 x Relay output |
| • 1 X Digital output | |

Testing

EMC Standard EN61800-3 Category C2
