RAPID RESPONSE INTERNAL GRILLE WITH CLIP-IN SPIGOT

DESCRIPTION

The Rapid Response ceiling grille features a unique spigot that can be fitted for horizontal or vertical oriented duct connection, making them suitable for narrow ceiling voids such as between floors or within cathedral ceilings. It works in conjunction with roof, in-line or external wall mounted fans in domestic and light commercial applications and feature a modern, low resistance grille.

Features

- Spigot can be fitted horizontally or vertically.
- Available with a square flush to the ceiling modern grille.
- Fits a standard 10" round fan cut out.
- Unique 'push-out' ceiling clamps make installation easy.
- Clip-in spigot makes installation and duct connection easier.
- Grille can be easily removed for cleaning.

Typical Applications

Installed in conjunction with a duct mounted fan in toilets, bathrooms, laundries, kitchens and ensuites.

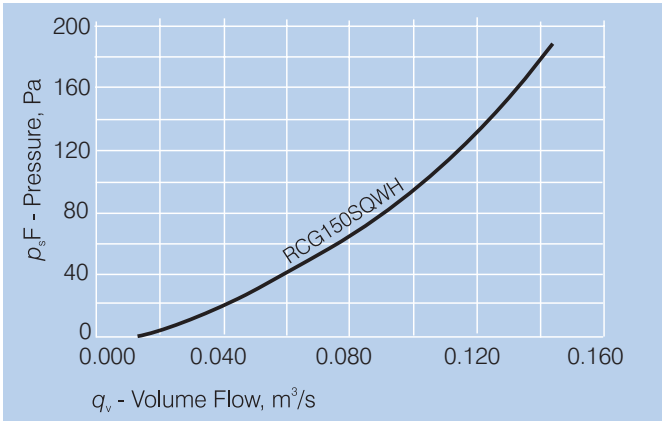

Construction

Grille is of injection-moulded ABS plastic. Cushion head box and spigot are of polyethylene.

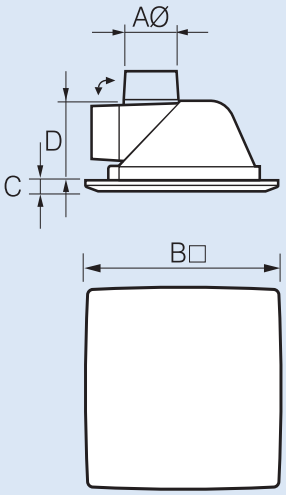

Testing

Air flow tests based on ISO5801:2007
