AVIATOR 7" GRAPHIC USER INTERFACE

DESCRIPTION

The large 7" touchscreen has been designed as an intuitive and easy-to-use Graphic User Interface (GUI) for the Aviator MAX and MINI controllers. The GUI can be mounted up to 500m from the MAX or MINI controller, either on a mechanical service panel or on a wall in the control room.

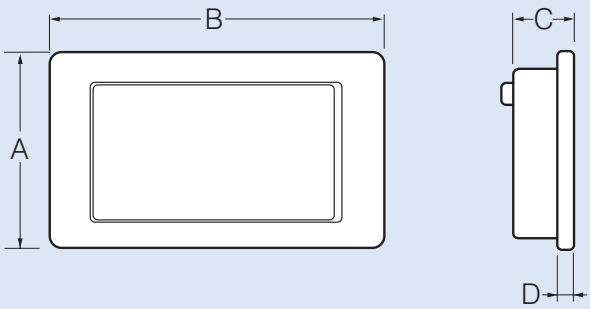

This Aviator GUI supports 5 modes of operation:

- Car parks with JetVent fans
- Sports stadiums with HVLS fans
- Sports stadiums with mixing fans
- Warehouse facilities with HVLS fans
- Warehouse facilities with mixing fans

Features

- Large, high definition 7" LCD touch screen with animated graphics
- Main screen summarises the system status and includes highest pollutant sensor monitoring
- Zone screens for each demand control area
- Individual screens for every fan and sensor that is connected
- Service setting and controller remote access screens
- Mechanical Services Auto/On/Off touch screen control
